

## **Astronics Best Value Added Award**

**To**

### **Datatronic Distribution Inc.**

Astronics Advanced Electronic Systems announced the awarding of their Best Value Added Award for 2007 to Datatronic Distribution Inc. in recognition of their outstanding contribution to providing better value to their manufactured products.

Datatronic Distribution Inc. produces custom wirewound magnetic components of superior quality and value through world class design, fast prototyping, lean manufacturing practices and unmatched customer service.

Astronics Corporation is a leader in advanced, high performance on-board power systems, lighting controls, electrical power generation and power distribution systems for the global aerospace industry. Astronics is unique in their ability to address the complete lighting and electrical power system needs of aircraft for the three major aircraft markets: commercial transport, business jet and the military markets. Astronics customers include all major aircraft manufacturers, airline operators, avionics companies and armed forces around the world.

Datatronic Distribution, Inc., manufactures custom and standard off-the-shelf transformers, inductors for switching power supplies, DC-DC converters, power conditioning, TS16949 automotive, instrumentation, process control, motor control and telecom applications.
