Subject: Amendment to MSEI Supplier Award 2007

Dear Mr. Siu,

Datatronics USA has consistently demonstrated first-class design and prototype capacities, excellent executive management, and outstanding customer service. Datatronics enabled MSEI to improve product quality through technology and manufacturing process improvement.

In recognition of Datatronics USA and Hong Kong team's collaborative approach to implementing business and technical solutions, flexibility and responsiveness, effectiveness and efficiency, Micro Systems Engineering awards its first Supplier Excellence Award in Technology and Operations to Datatronics.

Datatronic Hong Kong has contributed significantly to the success of and supported Datatronics USA to move partial manufacturing processes of Pulse Transformers and Power Transformers to the Hong Kong facility. These transformers are used in medical implantable devices, which require significant miniaturization coupled with tight specification requirements. The manufacturing processes relocations were implemented successfully with the same product quality as when the devices 100% made in USA.

MSEI is grateful for and recognizes the contribution and participation of Datatronic Hong Kong during the year of 2007 for the Micro System Engineering Award for Excellence in Technology and Operations.

Sincerely

A handwritten signature in black ink, appearing to read 'J. Lindner', with a stylized flourish at the end.

Jurgen Lindner, General Manager
